Motivated BSIS student with hands-on experience in systems development, QA testing, workflow automation, and business process improvement. Developed multiple internal business systems during internship at M Lhuillier Financial Services under the CAD IT Department. Skilled in Laravel, React, MySQL, and AI-assisted development tools. Strong background in user collaboration, requirements gathering, debugging, and developing efficient business solutions.

Core Skills

- Workflow Automation
- Requirements Gathering
- UI/UX Prototyping
- Technical Documentation
- AI-Assisted Development
- Team Collaboration
- Systems Development
- Web Development
- QA Testing
- Debugging & Troubleshooting
- Systems Analysis
- Database Management

Tech Stack

- PHP
- JavaScript
- HTML/CSS
- MySQL
- Laravel
- React
- Tailwind CSS
- Git/GitHub
- Figma
- REST APIs

WORK EXPERIENCE

Full-Stack Web Developer Intern – CAD IT Department

M Lhuillier Financial Services - [February 2026 – May 2026]

- Conducted QA testing, bug tracking, and system validation for internal business systems.
- Developed and improved internal accounting and loan management systems.
- Collaborated with users and accounting personnel to gather requirements and optimize workflows.
- Participated in bi-weekly meetings, system presentations, and progress discussions.
- Performed debugging, testing, and feature enhancements throughout development.
- Applied AI-assisted development tools to improve implementation speed and productivity.

PROJECTS

ML Loans System

- Developed an internal loan management system for CAD operations to streamline loan workflows, records management, and user processes while implementing user-requested features and system improvements.

General Ledger Consolidated System

- Developed a centralized ledger management system for accounting operations to improve data organization, workflow efficiency, reporting processes, and overall system functionality through testing and debugging.

CapstoNova - Web-Based Capstone Archiving System

- Developed a web-based capstone archiving system with manuscript storage, title verification, classification, access control, and analytics, while serving as team leader and contributing to system planning, UI design, and implementation.

IPAMIS

- Assisted in developing a web-based academic information system for a doctoral research initiative by participating in requirements gathering, feature implementation, testing, and system improvement tasks.

EDUCATION

Bachelor of Science in Information Systems
Cebu Technological University – Main Campus
Expected Graduation: June 2026

CERTIFICATIONS

TESDA National Certificate II (NC II)
Computer Systems Servicing
Issued: February 2020
